NAAC ACCREDITED 2020

22 YEARS

ADD ON
CERTIFICATION PROGRAM
on
Basic and Advance Excel

BBA 1st Year students

Date: 22nd September, 2023 to 10th October, 2023
Time: 2:00 PM - 5:00 PM | Venue: Computer Lab, B Block

Coordinator:
Mr. Sachin Kumar

Resource Person
Mr. Tanay Ojha

Mangalmay Institute of Management Technology
Greater Noida (U.P.)

Date: 1st Sep, 2023

NOTICE

All the students of BBA I Year are hereby informed that MIMT is organizing Add on - Certification Course on 'Basic and Advanced Excel'; The students gain comprehensive skills and learn essential functions, data analysis, and advanced techniques to enhance proficiency and productivity. The details of the same are given below:

Program Details: -

Date: 22nd Sep – 10th Oct '23

Time: 2:00 PM - 5:00 PM

Venue: Computer Lab, MIMT

Beneficiaries: BBA I Year Students

Resource Person: Mr. Tanay Ojha

Activity Coordinator: Mr. Sachin Kumar

Participation: Participants can give their names to the coordinators by 18th September 2023.

Associate Dean,

MIMT

CC to:

SYLLABUS

(36 Hours)

BASIC AND ADVANCED EXCEL SKILLS		
S.No.	**Content**	**Hours**
1	Understanding the Excel Interface, Workbook, Worksheet, Cells and Data Entry, Formatting Texts,numbers and Dates and using Cell Styles	3
2	Learning to use basic functions like SUM, AVERAGE,MIN and MAX, Understanding relative, absolute and mixed cell references	3
3	Sorting and filtering data to analyze and organise information, Creating basic charts like bar charts, pie charts and line graphs	3
4	Ensuring Data accuracy with data validation rules, Simple data analysis techniques including PIVOT Tables	3
5	VLOOKUP, HLOOKUP,INDEXMATCH and IF functions, Applying advanced conditional formatting rules	3
6	Creating Data Tables and using goal seek and scenarios, Creating complex charts like waterfall charts, combo charts and dynamic charts	3
7	In depth knowledge of Pivot Tables and Pivot Charts for Data analysis, Using Tools like Data Analysis Tool Pack, Solver and Power Query	3
8	Recording and running macros to automate repetitive tasks, Introduction to Data Modeling and related databases	3
9	Mastering advanced Keyboard shortcuts,	3
10	Using Financial Functions for financial analysis and modeling	3
11	Automation of Data using Visual Basics,	3
12	Hands-on Practise Session	3

Mangalmay Institute of Management Technology
Greater Noida (U.P.)

Schedule

S.No.	Content	Date	Time
	BASIC AND ADVANCED EXCEL SKILLS		
1	Understanding the Excel Interface, Workbook, Worksheet, Cells and Data Entry, Formating Texts,numbers and Dates and using Cell Styles	22.09.2023	2:00 pm 5:00 pm
2	Learning to use basic functions like SUM, AVERAGE,MIN and MAX, Understanding relative, absolute and mixed cell references	25.09.2023	2:00 pm 5:00 pm
3	Sorting and filtering data to analyze and organise information, Creating basic charts like bar charts, pie charts and line graphs	26.09.2023	2:00 pm 5:00 pm
4	Ensuring Data accuracy with data validiation rules, Simple data analysis techniques including PIVOT Tables	27.09.2023	2:00 pm 5:00 pm
5	VLOOKUP, HLOOKUP,INDEXMATCH and IF functions, Applying advanced conditional formatting rules	28.09.2023	2:00 pm 5:00 pm
6	Creating Data Tables and using goal seek and scenarios, Creating complex charts like waterfall charts, combo charts and dynamic charts	29.09.2023	2:00 pm 5:00 pm
7	In depth knowledge of Pivot Tables and Pivot Charts for Data analysis, Using Tools like Data Analysis Tool Pack, Solver and Power Query	03.10.2023	2:00 pm 5:00 pm
8	Recording and running macros to automate repetitive tasks, Introduction to Data Modeling and related databases	04.10.2023	2:00 pm 5:00 pm
9	Mastering advanced Keyboard shortcuts,	05.10.2023	2:00 pm 5:00 pm
10	Using Financial Functions for financial analysis and modeling	06.10.2023	2:00 pm 5:00 pm
11	Automation of Data using Visual Basics,	09.10.2023	2:00 pm 5:00 pm
12	Hands-on Practice Session on till date content	10.10.2023	2:00 pm 5:00 pm
	Assessment	12.10.2023	2:00 pm- 3:00 pm

Report	
Name of Activity	Add on Certificate Course on Basic and Advanced Excel
Date	22nd Sep – 9th Oct '23
Venue	Computer Lab
Organized by	Management Department
Participation	BBA I Year Students
No. of Participants	143
Resource Person	Mr. Tanay Ojha
Activity Convener	Mr. Sachin Kumar
Objective	1) **Enhance Proficiency in Excel:** Equip participants with comprehensive skills for efficient data management, analysis, and visualization using Excel's diverse tools and functions. 2) **Automate and Implement Advanced Techniques:** Introduce automation and advanced analytical methods, including VBA scripting and financial functions, to improve efficiency and precision in data-related tasks.
Content	**Day 1: Understanding the Excel Interface** In this session, participants were introduced to the fundamental components of Excel, including the interface, workbook, worksheet, cells, and data entry methods. They explored how to navigate the Excel interface, understanding the ribbon, tabs, and command groups. The session covered basic tasks such as creating a new workbook, adding, renaming, and deleting worksheets, and entering and editing data in cells. Formatting techniques were discussed in detail, including how to format texts, numbers, and dates, and apply cell styles to improve the appearance and readability of the data. Participants also learned about various formatting options, such as

font styles, colors, borders, and cell alignment, to ensure that their spreadsheets were well-organized and visually appealing.

Day 2: Basic Functions and Cell References

Participants learned to use basic functions such as SUM, AVERAGE, MIN, and MAX to perform simple calculations. The session emphasized understanding relative, absolute, and mixed cell references, highlighting how they impact the behavior of formulas when copied across different cells. Practical exercises helped participants gain hands-on experience in applying these functions and references to various datasets, ensuring they could confidently perform essential arithmetic operations and manage cell references in their spreadsheets.

Day 3: Data Sorting, Filtering, and Basic Charts

This session focused on sorting and filtering data to analyze and organize information effectively. Participants learned how to sort data in ascending and descending order, apply multiple levels of sorting, and use custom sort options. Filtering techniques were covered, including using AutoFilter to display specific data subsets based on criteria. The session also introduced creating basic charts such as bar charts, pie charts, and line graphs. Participants practiced designing and customizing charts to visually represent their data, enhancing their ability to communicate insights through graphical presentations.

Day 4: Data Validation and Simple Data Analysis

Participants were taught to ensure data accuracy by applying data validation rules. They explored different types of validation criteria, such as whole numbers, decimals, dates, and lists, to restrict data entry and maintain data integrity. The session also covered simple data analysis techniques, including creating and using Pivot Tables. Participants learned to summarize, analyze, and present data dynamically using Pivot Tables, enabling them to extract meaningful insights and make data-driven decisions effectively.

Day 5: Advanced Functions and Conditional Formatting

In this session, participants delved into advanced functions like VLOOKUP, HLOOKUP, INDEX MATCH, and IF functions. They explored practical applications of these functions in various scenarios, such as retrieving data from different tables, performing lookups, and implementing logical tests. Advanced conditional formatting rules were also covered, allowing participants to apply complex formatting based on specific criteria. Through hands-on exercises, they gained

proficiency in using these powerful functions and formatting techniques to enhance their data analysis capabilities.

Day 6: Data Tables and Complex Charts

Participants learned to create and use data tables for better data management and analysis. The session covered techniques like Goal Seek and Scenarios to explore different data scenarios and find optimal solutions. Creating complex charts, including waterfall charts, combo charts, and dynamic charts, was also a key focus. Participants practiced designing and customizing these advanced charts to present complex data visually, making it easier to interpret and share insights.

Day 7: In-Depth Data Analysis with Pivot Tables and Tools

This session provided an in-depth exploration of Pivot Tables and Pivot Charts for advanced data analysis. Participants learned to create and customize Pivot Tables, use calculated fields and items, and apply various aggregation methods. They also explored data analysis tools like the Data Analysis Tool Pack, Solver, and Power Query, gaining skills to perform sophisticated data manipulation, optimization, and extraction tasks.

Day 8: Automation with Macros and Data Modeling

Participants were introduced to recording and running macros to automate repetitive tasks. They learned to create, edit, and execute macros, enhancing their efficiency in handling routine processes. The session also covered the basics of data modeling and related databases, providing participants with a foundational understanding of how to structure and manage complex data relationships within Excel.

Day 9: Mastering Advanced Keyboard Shortcuts

In this session, participants focused on mastering advanced keyboard shortcuts to boost their productivity and efficiency in Excel. They practiced using shortcuts for navigation, data entry, formatting, and executing commands quickly. The session aimed to equip participants with the skills to perform tasks swiftly and accurately, reducing reliance on the mouse and streamlining their workflow.

Day 10: Financial Functions for Analysis and Modeling

Participants learned to use financial functions for financial analysis and modeling. The session covered functions like PV, FV, NPV, IRR, and PMT, providing practical examples of how to apply these functions in real-world financial scenarios. Participants practiced

	creating financial models, performing investment analysis, and evaluating financial performance using these powerful Excel functions.
	Day 11: Automation of Data Using Visual Basics
	This session introduced participants to automation using Visual Basic for Applications (VBA). They learned to write and run VBA scripts to automate complex tasks, customize functionality, and create user-defined functions. The session included hands-on practice in developing VBA macros, debugging code, and integrating VBA with Excel to enhance automation and efficiency in their workflows.
	Day 12: Hands-On Practice Session
	The final session provided participants with an opportunity to apply the knowledge and skills gained throughout the course in a hands-on practice environment. They worked on practical exercises and real-life scenarios, reinforcing their understanding and proficiency in using Excel for various tasks. Instructors provided guidance and feedback, ensuring participants could confidently implement their learning in their professional and personal projects.
	This structured approach ensures a thorough understanding of Excel's capabilities, from basic to advanced features, enabling participants to leverage Excel effectively for various tasks.
Assessment	Assessment taken on MCQ pattern on 12th October, 2023
Outcome of Activity	Participants will efficiently manage and analyze data, automate tasks, and apply advanced Excel techniques for enhanced productivity and decision-making.

Resource Person's Profile

Mr Tanay Ojha

Tanay Ojha is a seasoned professional renowned for his expertise in both Basic and Advanced Excel skills. With over a decade of experience in the field, Tanay has demonstrated an exceptional proficiency in navigating the intricacies of Excel, ranging from fundamental data entry and formatting to complex functions, data analysis, and automation techniques. His comprehensive knowledge and hands-on experience have empowered him to streamline workflows, optimize data management processes, and deliver actionable insights through advanced analysis and reporting. Tanay's adeptness in leveraging Excel's capabilities has consistently contributed to enhancing organizational productivity, efficiency, and decision-making across diverse industries. His commitment to staying abreast of the latest Excel developments and his dedication to sharing his expertise through training and mentoring make him a highly sought-after expert in the realm of Excel proficiency.

SAMPLE CERTIFICATE

Mangalmay Institute of Management Technology
Greater Noida (U.P.)

CERTIFICATE

It is to certify that **Ms. Vanshika baliyan** of **BBA 1st year** has successfully completed **36 hours** certification course on **"Basic and Advance Excel" from 22/09/2023 to 10/10/2023** organized by Mangalmay Institute of Management & Technology, Greater Noida.

VICE CHAIRMAN	**IQAC Coordinator**	**PRINCIPAL**
Mangalmay Group of Institutions	Mangalmay Institute of Management & Technology	Mangalmay Institute of Management & Technology

Sample Assessment

39/40

COURSE: BBA 1ST YEAR

ADD ON COURSE ASSESSMENT
COURSE NAME- BASIC AND ADVANCED EXCEL

Date 12/10/23

Name: ABHISHGA   Roll No. 23099010204   Invigilator Sign:

General Instructions: Each question carries 2 marks. All questions are compulsory.

1. Which function is used to find the highest value in a range of cells?
A. MAX
B. MIN
C. SUM
D. AVERAGE

2. In Excel, which type of cell reference remains constant when copied to other cells?
A. Absolute
B. Relative
C. Mixed
D. Circular

3. What does the COUNTIF function do in Excel?
A. Counts the total number of cells in a range that contain numbers
B. Counts the total number of cells in a range that are not empty
C. Counts the number of cells in a range that meet a single condition
D. Counts the number of cells in a range that meet multiple conditions

4. Which option in Excel allows you to highlight cells based on a specific condition?
A. Data Validation
B. Sort & Filter
C. Conditional Formatting
D. Group and Outline

5. What is a PivotTable used for in Excel?
A. Creating charts from data
B. Performing complex calculations on data
C. Summarizing and analyzing data
D. Filtering data based on conditions

6. Which chart type in Excel is best for showing the relationship between two variables?
A. Pie Chart
B. Line Chart
C. Bar Chart
D. Scatter Plot

7. What does Data Validation in Excel allow you to do?
A. Automatically correct errors in your data

B. Restrict the type of data that can be entered into a cell
C. Validate the formulae used in cells
D. Apply conditional formatting to cells

8. In Excel, what is a named range?
A. A range of cells that have been assigned a unique name
B. A range of cells that contains only numbers
C. A range of cells that have been merged into one
D. A range of cells that have been formatted as a table

9. What is an array formula in Excel?
A. A formula that only works with text data
B. A formula that performs multiple calculations on one or more sets of values
C. A formula that automatically updates when data changes
D. A formula that converts numbers into text format

10. What does the Goal Seek feature in Excel allow you to do?
A. Find and replace specific data in a worksheet
B. Search for formulas that are causing errors
C. Calculate the percentage change between two values
D. Determine the input needed to achieve a desired result

11. In Excel, what is a data table primarily used for?
A. Storing large amounts of text data
B. Organizing data into categories and subcategories
C. Performing what-if analysis for multiple variables
D. Sorting data alphabetically

12. What is the Solver tool used for in Excel?
A. Analyzing pivot tables
B. Solving complex algebraic equations
C. Finding optimal solutions to mathematical problems
D. Creating macros to automate tasks

13. Which Excel feature allows you to create and manage different sets of input values to see different possible results?
A. Goal Seek
B. Solver
C. Scenario Manager
D. Data Tables

14. What is Power Query used for in Excel?
A. Creating interactive dashboards
B. Importing, transforming, and combining data from different sources
C. Calculating complex financial formulas
D. Generating random data sets

15. What new feature in Excel allows formulas to automatically spill results into adjacent cells?

A. Data Validation
B. Dynamic Arrays
C. Power Pivot
D. Goal Seek

16. What does the Data Model feature in Excel enable you to do?
A. Create complex formulas
B. Import data from external databases
C. Analyze data using pivot tables across multiple tables
D. Sort data based on custom criteria

17. Which of the following is NOT an Excel Add-In?
A. Analysis ToolPak
B. Solver Add-In
C. Power Query
D. Sparklines

18. What is a macro in Excel?
A. A tool for creating animated charts
B. A series of instructions that automate repetitive tasks
C. A type of data validation rule
D. A function that returns a random number

19. Which of the following actions can you perform in Excel Online?
A. Create and run macros
B. Use the Solver tool
C. Insert PivotTables
D. Share and collaborate on workbooks in real-time

20. Which keyboard shortcut in Excel allows you to paste values (not formulas)?
A. Ctrl + V
B. Ctrl + Shift + V
C. Ctrl + C
D. Ctrl + Alt + V
